- Flame-retardant (BS 6807 CRIB 5)

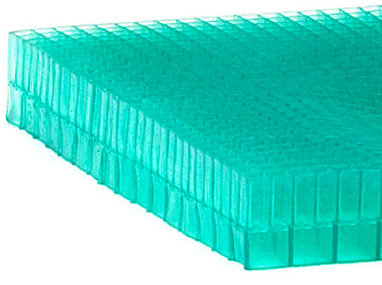
+ Now with a 3-year warranty

+ Maximum comfort and pressure-free

These products combine the advantages of gel and air chamber systems. Compared to simple gel products, **GEL-AIR-TEC** is considerably lighter and less expensive.

When it comes to seated and reclined comfort, **GEL-AIR-TEC** products are at an advantage compared to cold foam products with the same thickness.* The revolutionary gel honeycomb structure only yields at pressure points.

The numbers concerning pressure are impressive as well as the patients and user feedback.** Take the test yourself and enjoy the seated and reclined comfort.



If pressure is released from **GEL-AIR-TEC**, the core goes back to its original shape. The product line comes across as soft and solid at the same time.

Due to a highly breathable core, patients will not experience unpleasant sweating. As well as decubitus prophylaxis, the products also feature added spring comfort in the vehicle.

Main item	Item no.
GEL-AIR-TEC mattress f. wheeled stretchers, 48 cm	12002
Wing mattress for extension to 90 cm	12004
GEL-AIR-TEC cushion, width: 46 cm	12003
